

## Full-time MBA

GISMA Business School is known for its **unique AACSB-accredited general management program**, which combines the quality of an internationally recognized U.S. MBA degree with extensive real-world experience in a German/European business context.

Our full-time MBA program is based on the core curriculum of our academic partner, Purdue University's Krannert School of Management, from which GISMA graduates receive one of their degrees upon completion of the program. With the advent of a formal partnership between GISMA Business School and the Leibniz University of Hannover (LUH), GISMA graduates now receive not only a **U.S. MBA degree**, but also a **German MBA degree** granted by the LUH, state-accredited German university with a 200-year tradition.

Our faculty members are all experts in their fields, and come from equally diverse cultural backgrounds as our student body.

Being a concentrated course of study, GISMA's full-time MBA program is completed in only **11 months**, though based on the same core curriculum as comparable two-year MBA programs. This timeframe is challenging but of special benefit to those who prefer not to take an extended career break in order to earn their degree.

**Practical relevance** is a guiding principle at GISMA, and is reflected both in our chosen teaching methods and our academic program. Parallel to their studies, students can count on the Career Center for comprehensive guidance and job-finding assistance.

We would like to meet you personally. Please register with our recruitment team to visit a lecture or come and see us at one of our events.

## Facts

- 11 month program
- Degrees from Purdue University and Leibniz Universität Hannover
- Very international program
- AACSB accredited
- Start: August
- Tuition: 30,000 EUR
